

What is claimed is:

1. A gaming machine comprising:

a rotary reel having a plurality of symbols on an outer periphery thereof;

5 a group of sheet members disposed in front of the rotary reel, the sheet members being laminated each other and each having an opening;

a liquid crystal panel disposed in front of the sheet members,

10 wherein the plurality of symbols are recognizable through the opening on each of the sheet members, from a front side of the gaming machine, and

wherein each of the sheet members includes;

a light guiding material; and

15 a light diffusion material disposed in front of the light guiding material and having a larger opening than an opening of the light guiding material.

2. A gaming machine comprising:

20 a rotary reel having a plurality of symbols on an outer periphery thereof;

a group of sheet members disposed in front of the rotary reel, the sheet members being laminated each other and each having an opening;

25 a liquid crystal panel disposed in front of the sheet members,

wherein the plurality of symbols are
recognizable through the opening on each of the sheet
members, from a front side of the gaming machine, and

wherein each of the sheet members includes;

5 a light reflecting material; and

a light transmitting material disposed in front
of the light reflecting material and having a larger
opening than an opening of the light reflecting
material.
